TRADITIONAL VC FAILS

HAZARD

Long, expensive R&D cycles.

HAZARD

Severe regulatory entry barriers.

HAZARD

Tech searching for problems.

HAZARD

Extreme single-client risk.

THE SOLID BUILDER MODEL

✓ Built-in risk reduction approach.

✓ Agile security execution contractor.

✓ Building businesses, not taking bets.

✓ Tailored for institutional capital.

DUAL-USE COTS STRATEGY

» Integrating Tier-1 civilian components.

» Immediate cash from civilian clients.

» Eliminating basic research needs completely.

» Neutralizing government budget dependencies.

RIGOROUS RISK MANAGEMENT

Rigorous Zero-Stage
Engineering Validation

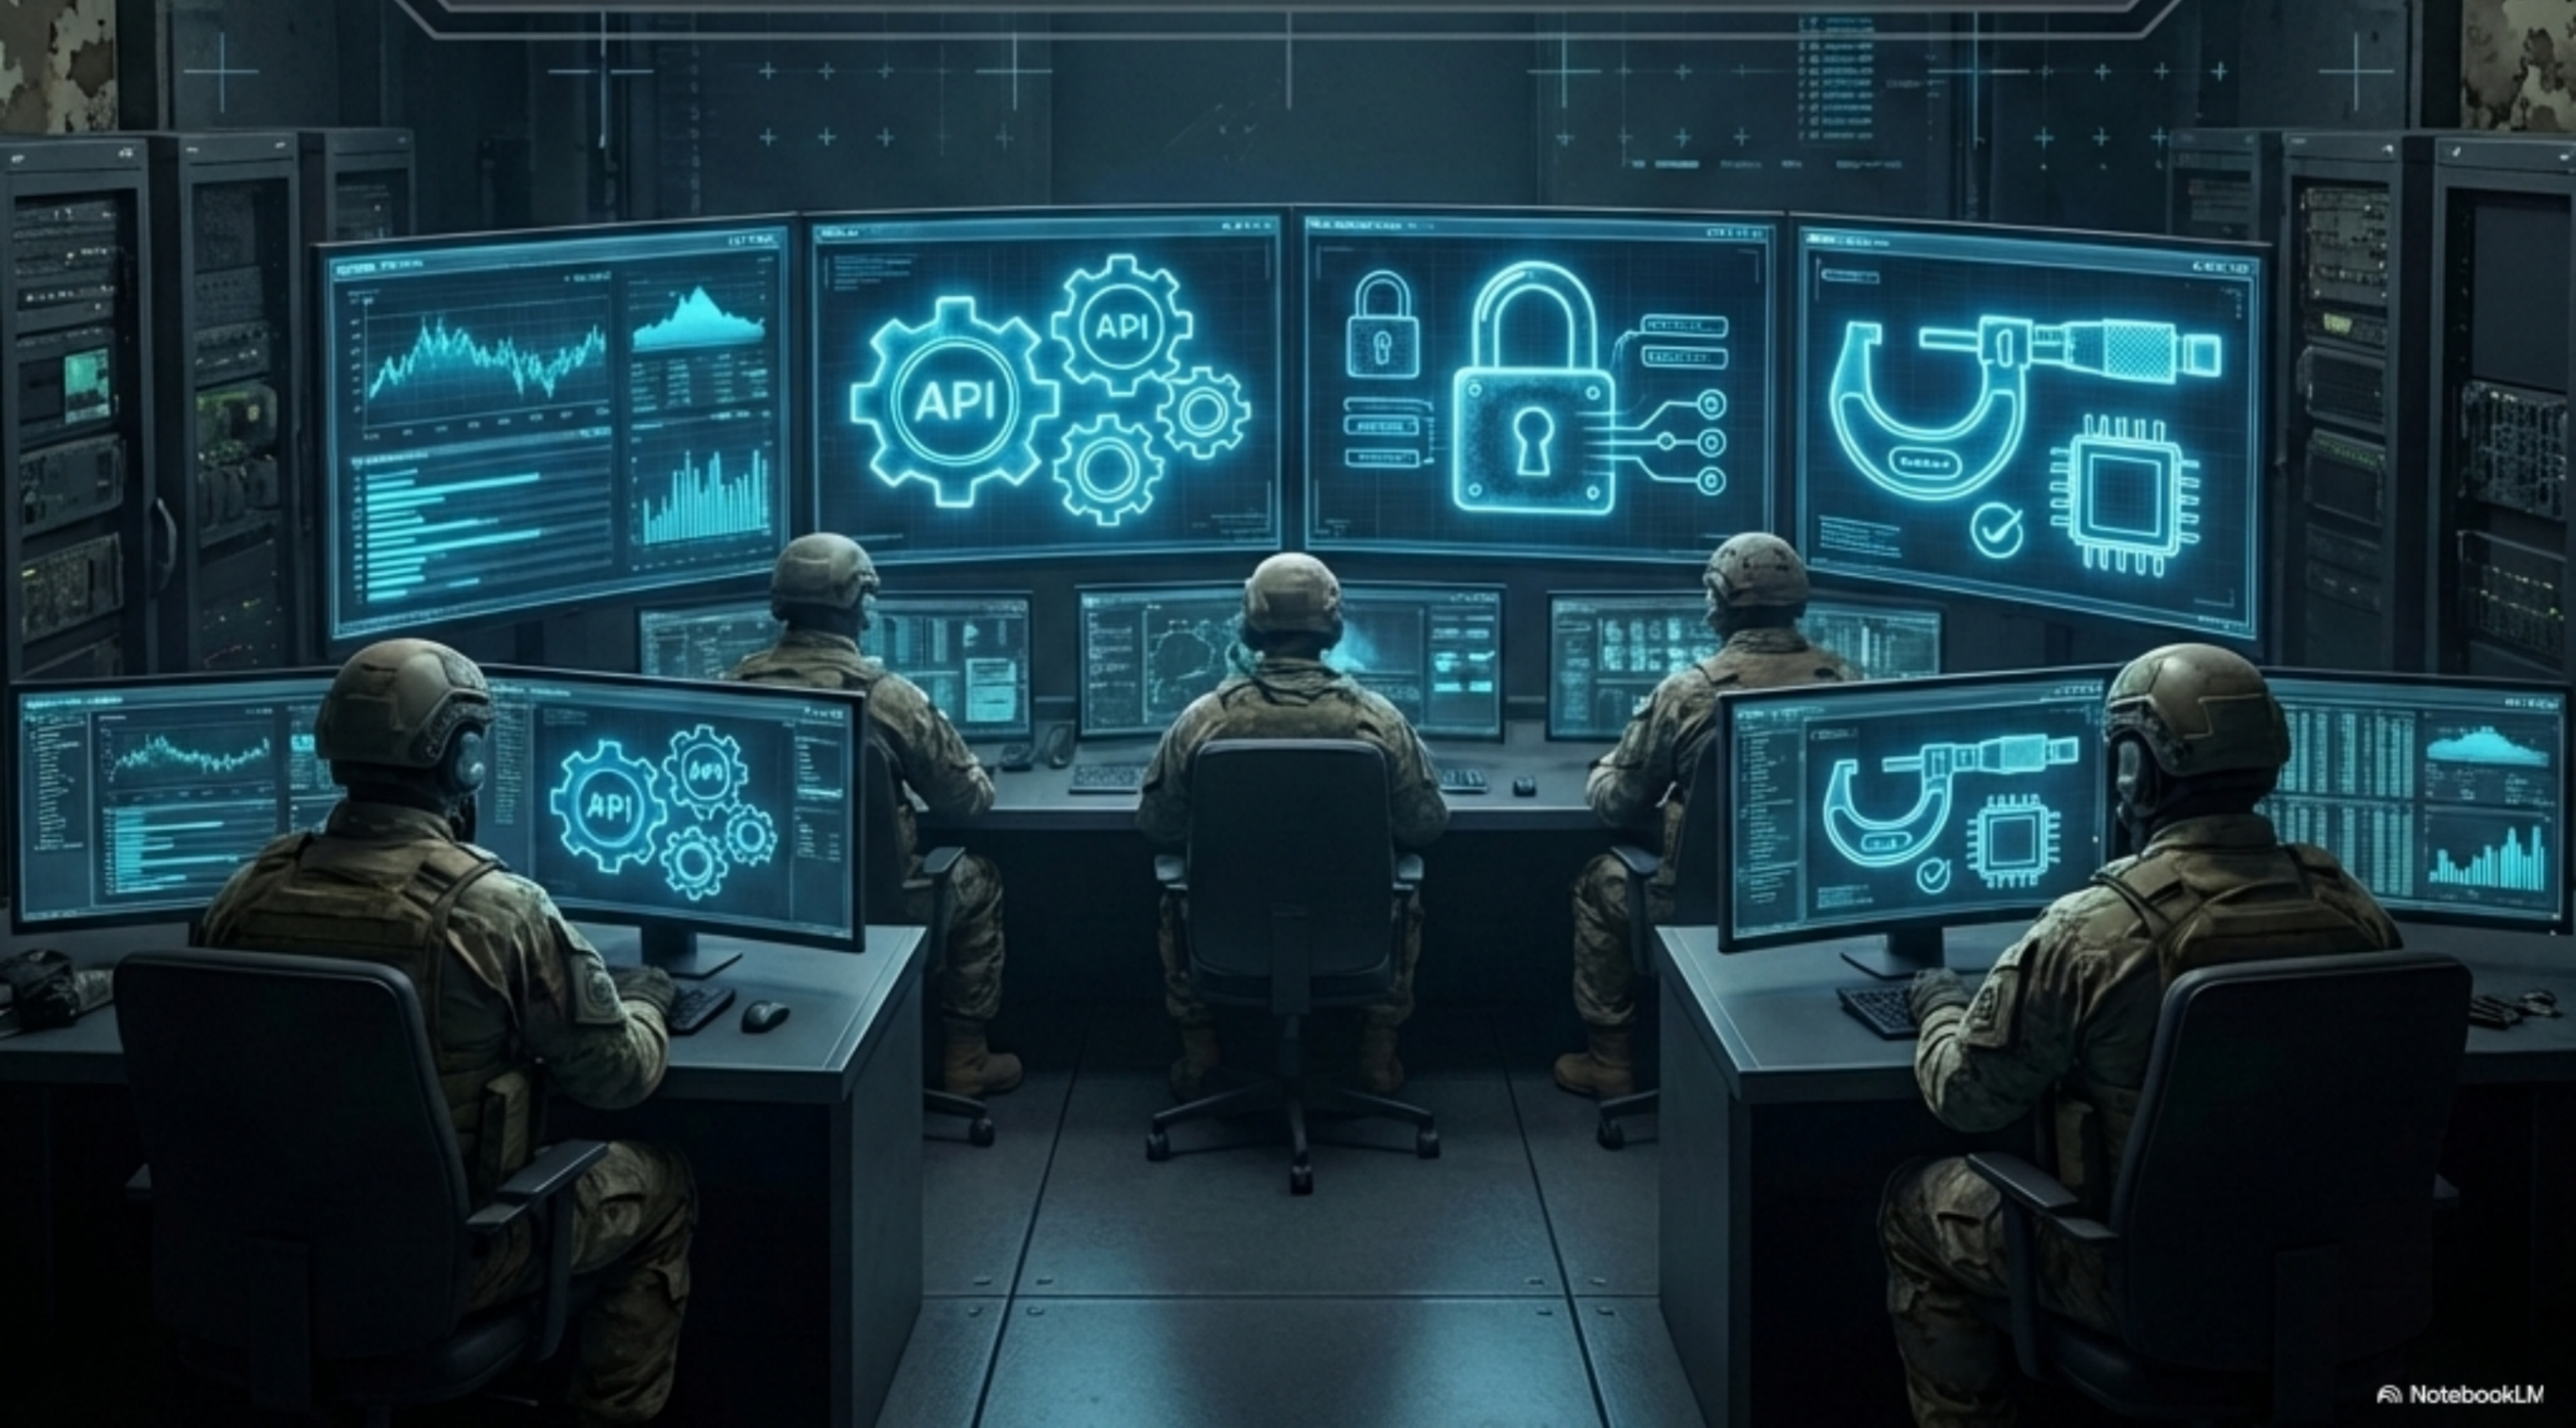

Standard Integration
Interface Utilization

Vendor Diversification
for Dependency
Prevention

Stringent Industrial
Quality Control

SIGNAL TTEVS
OPERATOR TINEAFON

LEAN STRUCTURE. OPERATIONAL LOCK-IN.

- [>] Field experts lead every venture.
- [>] Equity-based compensation aligns interests.
- [>] Deep integration into client processes.
- [>] De-facto standard in defense tenders.

RAPID ROI AND DYNAMIC PORTFOLIO

OPEX funds rapid
engineering validation.

CAPEX scales proven,
yielding assets.

Fast sales to defense
contractors.

Highly profitable,
predictable industrial
process.
